Abstract
This project proposes the development of a School Billing System designed to streamline and automate fee manag

1. INTRODUCTION

The School Billing System is an automated solution for managing student fees and school financial transactions. It
The system reduces dependence on manual recordkeeping and improves transparency for all parties involved. It is

2. BACKGROUND OF THE STUDY

Manual billing systems are often prone to delays, duplication of records, calculation errors, and difficulty in tracking
The School Billing System addresses these concerns by providing an efficient digital process for student billing, fee

3. PROBLEM STATEMENT

The school currently experiences difficulties in managing billing records manually. These issues include inaccurate
Without a centralized billing system, school administrators spend too much time on repetitive financial tasks and are

4. OBJECTIVES OF THE STUDY

To automate school fee collection and payment recording.
To generate accurate billing statements and invoices for each student.
To monitor outstanding balances and payment statuses.
To reduce manual workload and human error in school financial operations.
To provide role-based access for administrators and students.
To improve financial transparency and reporting for decision-making.

5. SCOPE OF THE STUDY

The system includes student information management, school fee definitions, invoice generation, payment recordin
The system is limited to fees, student accounts, and payment operations. It does not cover academic grading or ge

6. FUNCTIONAL REQUIREMENTS

The system shall allow administrators to manage student records and billing information.
The system shall allow administrators to add fees, school terms, and billing policies.
The system shall generate student bills and itemized invoices with details of charges and payment status.
The system shall record student payments and automatically update balances.
The system shall prevent duplicate billing entries and invalid overpayments.
The system shall provide statement of account reports and payment history for students.
The system shall support secure login and role-based access control.
The system shall allow authorized users to generate financial reports and summaries.

7. NON-FUNCTIONAL REQUIREMENTS

The system must be reliable, accurate, and easy to use.
The system must protect financial data through secure authentication and access control.
The system must be responsive and compatible with standard web browsers.
The system must be scalable to support future school growth and additional features.
The system must maintain data integrity and minimize errors in transaction processing.

8. USERS OF THE SYSTEM

Administrator: manages student accounts, billing setup, invoices, and reports.
Student: views billing statements, payment records, and outstanding balances.
School staff or authorized personnel: access billing data based on assigned privileges.

9. BENEFITS OF THE SYSTEM

Improved efficiency in school fee management.
Reduced manual workload and paperwork.
Accurate and transparent student billing records.
Better payment tracking and monitoring of balances.
Faster generation of invoices and reports.
Enhanced confidence in financial decision-making.

10. CONCLUSION

The School Billing System is a necessary solution for any educational institution that wants to improve its financial r
